

## Future-Ready: AI-on-Demand's key role in advancing AI, Data, and Robotics

Did you hear about the "Future-Ready: On-Demand Solutions with AI, Data, and Robotics" event in Brussels? It took place on February 18-19 and brought together some of the brightest minds in artificial intelligence, data, and robotics! Co-organised by the AI-on-Demand (AloD) platform and the AI Data Robotics Association (ADRA), it was a fantastic opportunity for stakeholders, researchers, and policymakers working on Horizon Europe projects to connect.

The first day ignited important conversations about the future of AI in Europe, with AloD playing a key role in shaping those discussions.

The second day focused on translating AI research into real-world applications, and once again, AloD was front and centre in crucial talks. It was exciting to witness such collaboration and innovation in one place, setting the stage for future advancements in our fields!

## The new version of the platform is coming soon!

Get ready for a fresh experience—our new version of the platform is on the way! We've been hard at work incorporating your feedback and enhancing features to make your journey with us even more rewarding. Expect a sleek design, improved functionality, and new tools that will empower you to leverage AI, data, and robotics like never before.

Stay tuned.

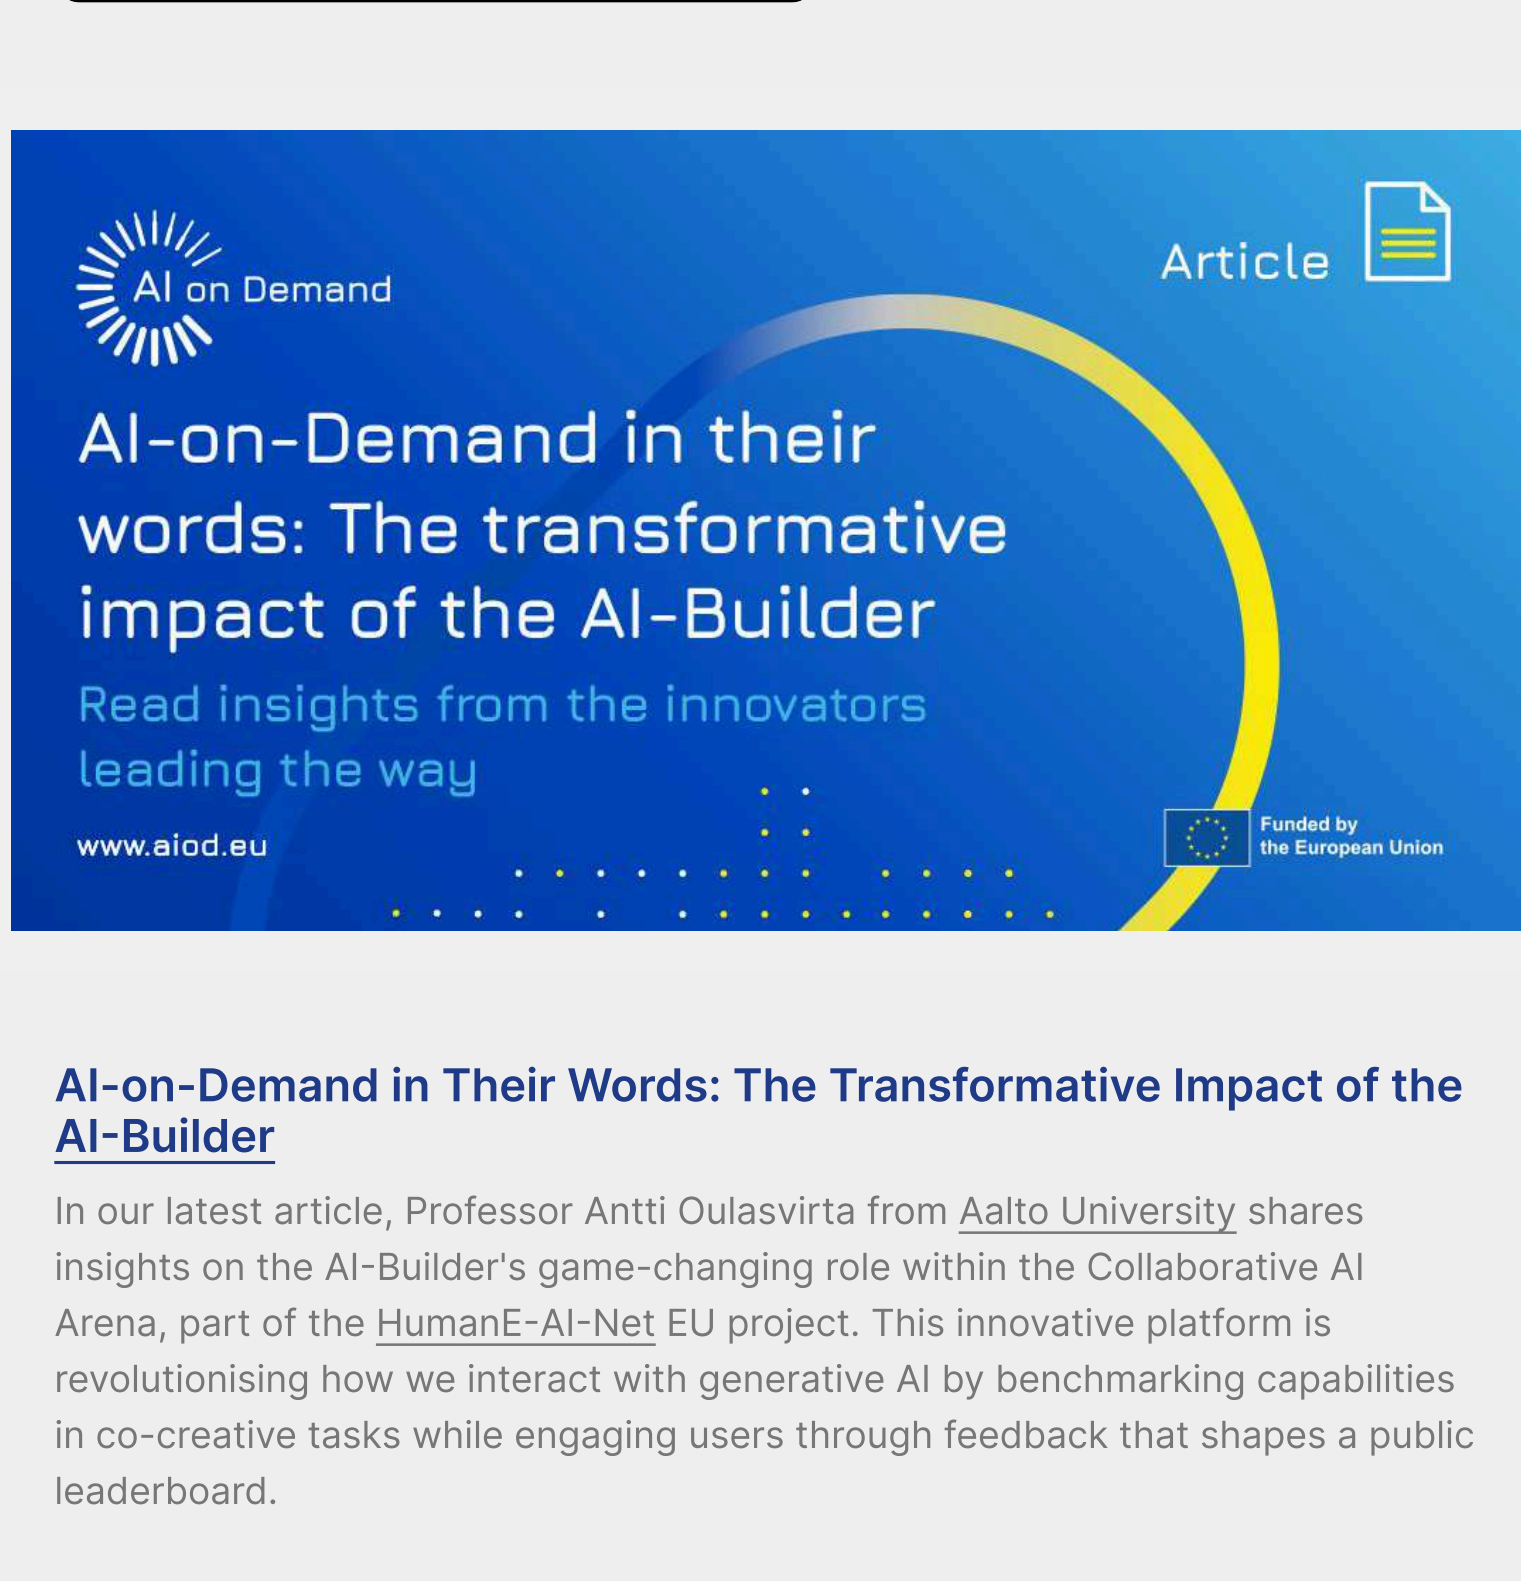

## Empowering the AI Community through Engagement and Collaboration

AI-on-Demand is fostering collaboration across Europe by creating an inclusive platform for researchers, policymakers, and industry leaders. With tools for discussion and development, plus the opportunity to become an Ambassador, AloD empowers individuals to shape AI's future. Read the full article to learn how you can get involved.

## News and Events

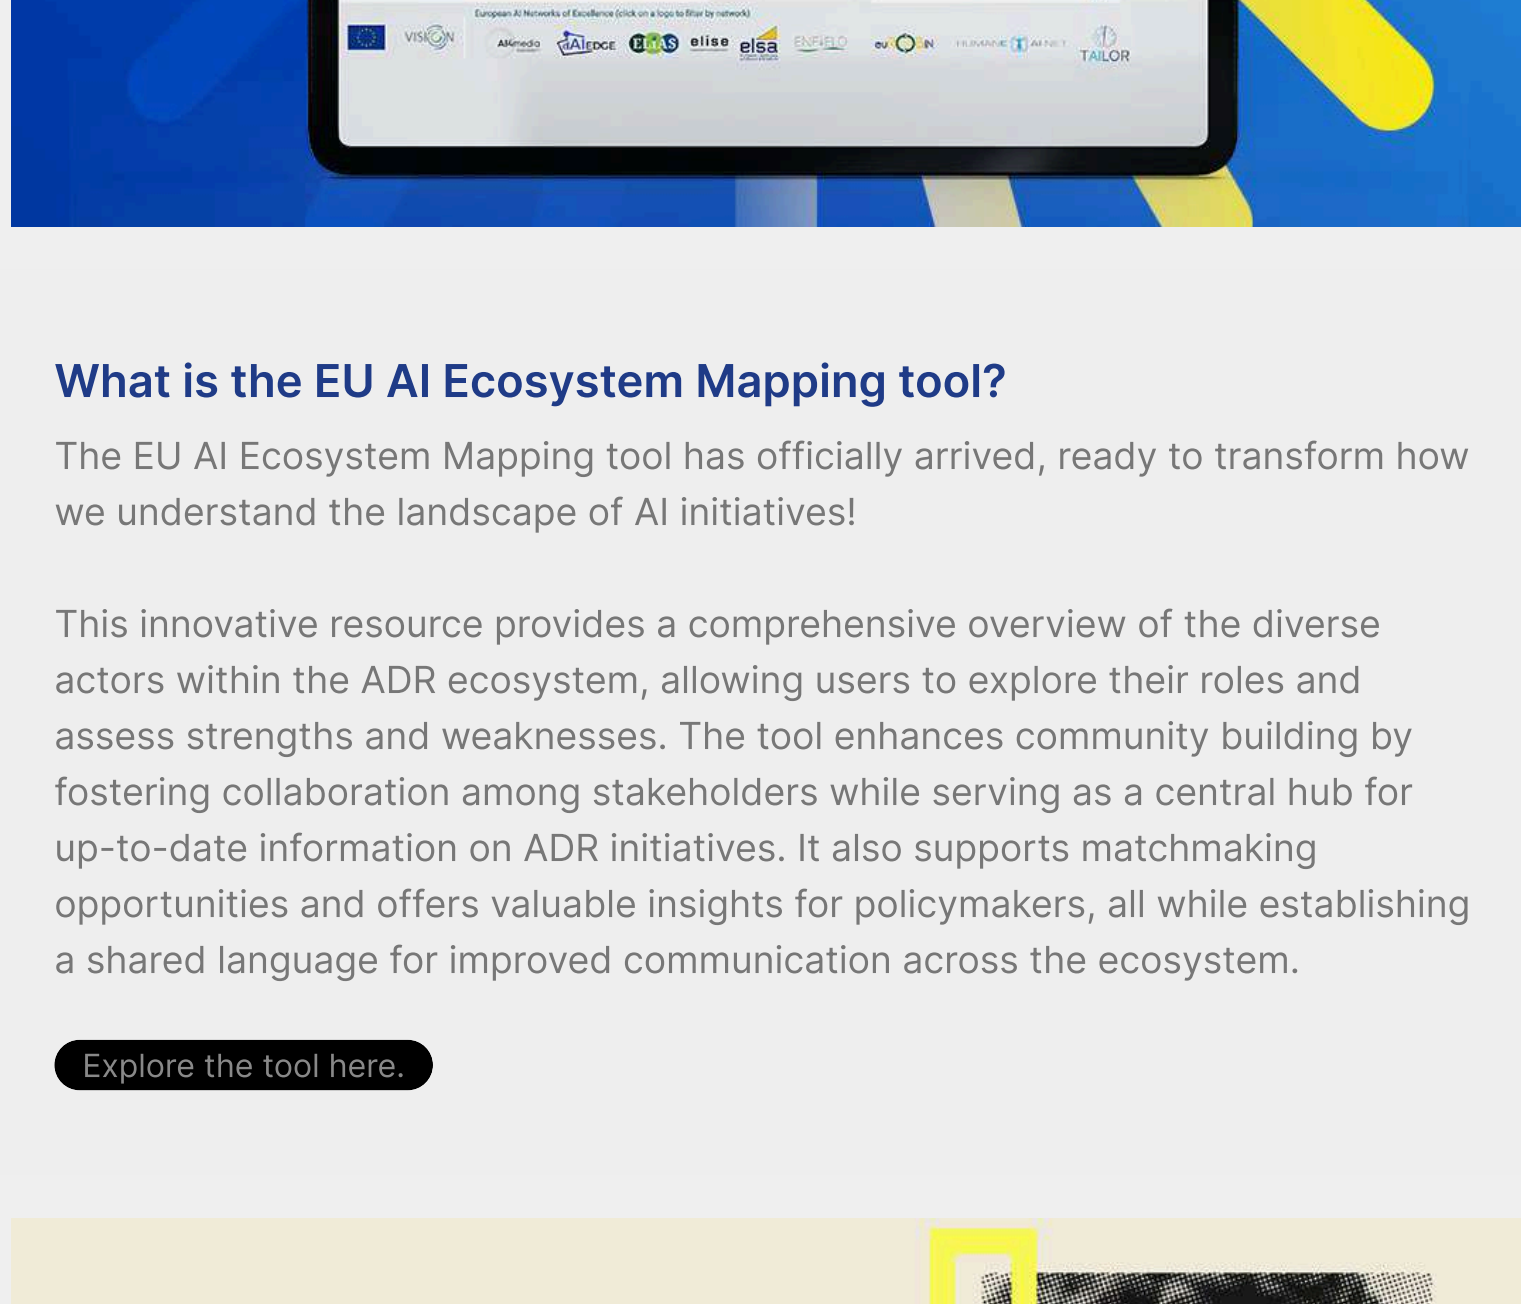

In case you've missed it

### Your dose of AI

Every month, we have been publishing compelling articles on our [LinkedIn](#) and [platform](#) for you. These pieces highlight the latest trends and innovations in AI, providing thought-provoking insights and practical applications.

Ready for a good read? We are waiting for you!

### AI-on-Demand in Their Words: The Transformative Impact of the AI-Builder

In our latest article, Professor Antti Oulasvirta from [Aalto University](#) shares insights on the AI-Builder's game-changing role within the Collaborative AI Arena, part of the [HumanE-AI-Net](#) EU project. This innovative platform is revolutionising how we interact with generative AI by benchmarking capabilities in co-creative tasks while engaging users through feedback that shapes a public leaderboard.

The [AI-Builder](#) makes it easy for professionals of all skill levels to compose AI pipelines and deploy solutions. Oulasvirta emphasises its potential to democratise AI development, empowering more people to participate in meaningful AI projects.

### What is the EU AI Ecosystem Mapping tool?

The EU AI Ecosystem Mapping tool has officially arrived, ready to transform how we understand the landscape of AI initiatives!

This innovative resource provides a comprehensive overview of the diverse actors within the ADR ecosystem, allowing users to explore their roles and assess strengths and weaknesses. The tool enhances community building by fostering collaboration among stakeholders while serving as a central hub for up-to-date information on ADR initiatives. It also supports matchmaking opportunities and offers valuable insights for policymakers, all while establishing a shared language for improved communication across the ecosystem.

[Explore the tool here.](#)

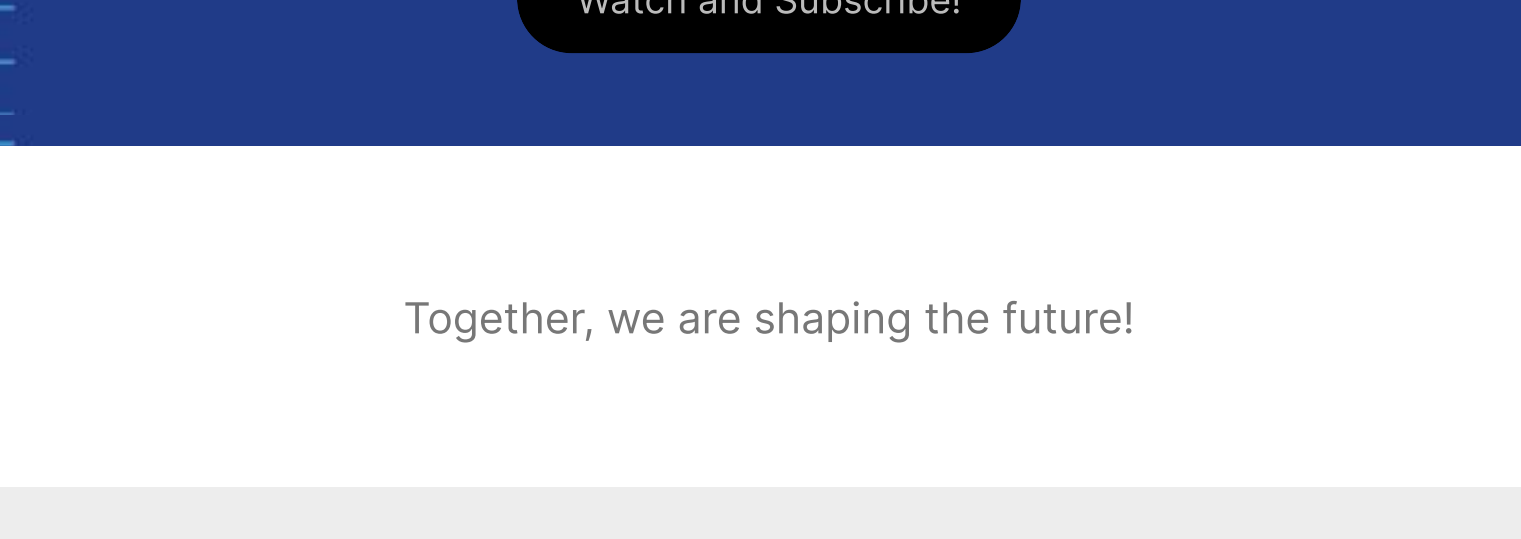

### Bridging Innovation and Regulation: The Role of AI Regulatory Sandboxes

AI Regulatory Sandboxes offer companies a controlled environment to test AI solutions with regulatory support, easing AI Act compliance. The [EUSAIr](#) project, funded by the European Commission, promotes standardised sandboxes, focusing on SMEs and startups. Take the [EUSAIr survey](#) to help shape AI regulations and access exclusive co-creation workshops!

## Future Events

### SmartAIDa Workshop at IEEE SmartComp 2025 | June 16 - 19, Cork (Ireland)

We are excited to announce the upcoming SmartAIDa Workshop at the IEEE SmartComp 2025 conference, taking place from June 16 to 19 in Cork, Ireland! This international conference is the premier event for smart computing, organised by [University College Cork](#) and [Munster Technological University](#).

#### Call for Papers

We invite high-quality submissions that address the challenges and innovations in sharing and monetising AI models and datasets. Accepted papers will be included in the SMARTCOMP 2025 proceedings and published in the IEEE Digital Library, allowing authors to upload the camera-ready versions to open-access platforms. This is a fantastic opportunity to share your research and contribute to the advancement of smart computing!

Are you curious to know more? Here.

### BIAS Spring School on Trustworthy and Fair AI | 7 - 10 April, Tallinn (Estonia)

The [BIAS Spring School on Trustworthy and Fair AI](#) is set to take place in Tallinn, Estonia, from April 7-10, 2025!

This event will bring together researchers, industry professionals, policymakers, and students to explore critical topics such as AI ethics, bias mitigation, and transparency, with a special focus on recruitment systems. Attendees will benefit from sessions featuring expert speakers from Google, the Estonian Parliament, and DigiStage Consulting.

Don't miss this unique opportunity to enhance your knowledge, network with industry leaders, and explore innovative approaches to fair AI!

Here's all you need to know.
