

## Let's start with some great news? The new AI-on-Demand platform is live!

In May, we launched the latest version of the AI-on-Demand platform — shaped by your feedback and developed to better support Europe's AI research community.

The platform now offers improved navigation, more accessible tools, and a streamlined way to discover, test, and share resources, from datasets and experiments to training materials and services.

Here's a quick look at the **tools and services** now available on the updated AI-on-Demand platform:

### Metadata Catalogue

Search assets across different platforms using a unified metadata schema, with support for programmatic integration.

[know more](#)

### AI Catalogue

Select and bookmark assets, including educational resources, for use with other services on the platform.

[know more](#)

### AI Builder

Access multilingual AI tools to retrieve, summarise, and generate content — no coding required.

[know more](#)

### RAIL

Create, reuse, and share experiments to support consistent evaluation and collaboration.

[know more](#)

### Success Stories (coming soon)

Discover how AI is transforming your field. Explore real success stories and connect directly with the experts behind them to get tailored insights and support.

### EU AI Ecosystem Mapping

Explore the landscape of AI actors in Europe to support collaboration, policy-making, and benchmarking.

[know more](#)

### RoboCompass

Identify non-technological barriers and access guidance for responsible robotics development.

[know more](#)

### Enhanced search

Find what truly matters. Instead of relying on basic keyword matches, the Enhanced Search uses machine learning to understand your query and deliver more accurate, relevant AI resources.

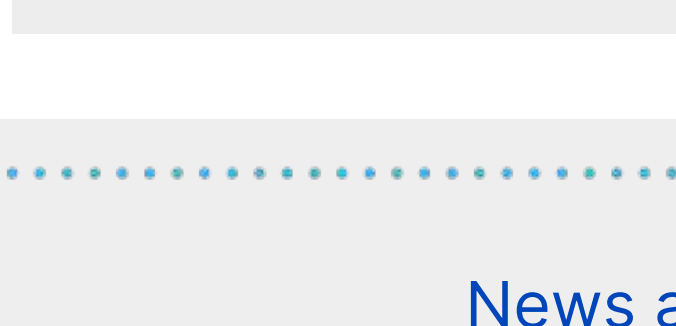

Beyond tools and services, the AI-on-Demand platform connects you with the European AI ecosystem. Discover EU-funded projects, connect with experts through the AI Expert Network, explore educational resources, and stay informed about events that bring the community together.

## Missed the AI-on-Demand webinars? Now you can catch up!

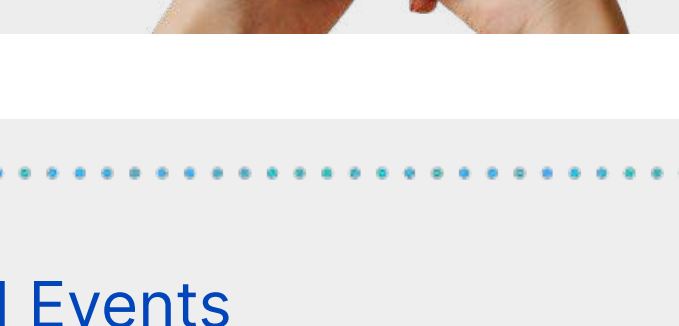

The **AI-on-Demand Webinar Series: AI innovation from research to market** explored how AI is moving from research to real-world impact, from tackling disinformation to powering sustainability across sectors.

We have had two transforming webinars so far:

### AI meets media: Tackling disinformation with cutting-edge innovation

Discover how AI is being used to identify and counter false information across digital platforms.

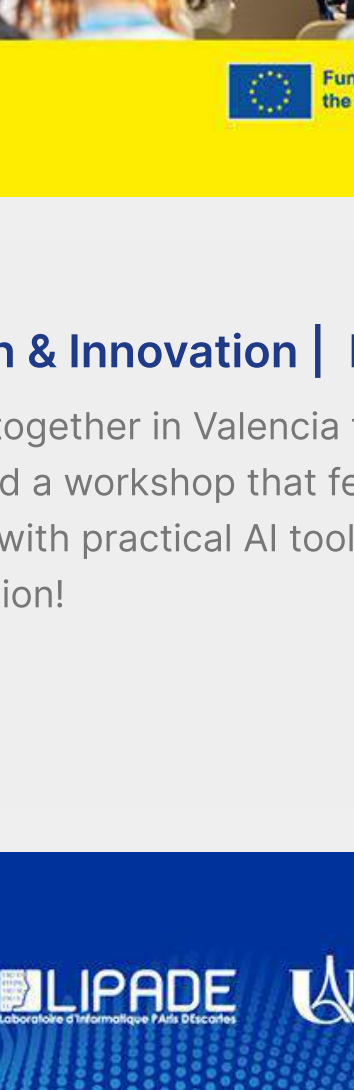

### Powering the Green Deal: AI-driven solutions for resource optimisation

See how AI, data, and robotics are helping key sectors become more sustainable and efficient.

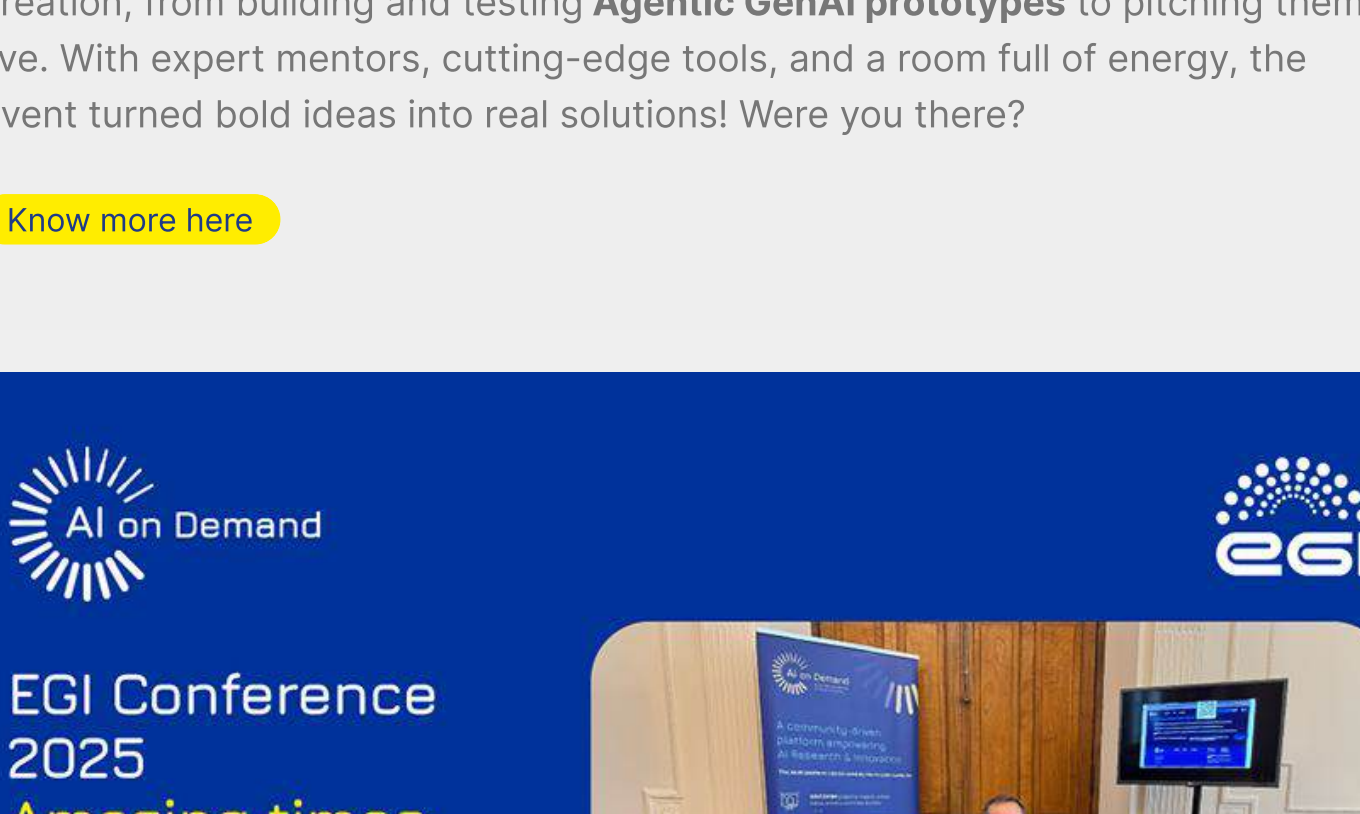

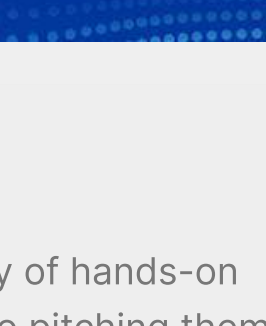

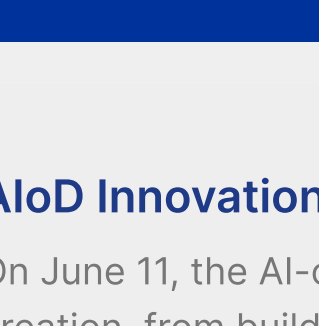

**Both sessions are now available to watch anytime.**

Funded by the European Union

### AI-on-Demand: Empowering AI Research & Innovation | May 20

Our **launch event** in May brought the community together in Valencia to celebrate the new AI-on-Demand platform. We had a workshop that featured keynotes, live UX testing, and hands-on sessions with practical AI tools. It was a day full of insights, demos, and collaboration!

### AIoD Innovation Lab | June 11

On June 11, the AI-on-Demand Innovation Lab brought a full day of hands-on creation, from building and testing **Agentic GenAI prototypes** to pitching them live. With expert mentors, cutting-edge tools, and a room full of energy, the event turned bold ideas into real solutions! Were you there?

### EGI Conference 2025 | June 2nd-6th

At this year's EGI Conference in Santander, we showcased the second version of the AI-on-Demand platform. At Booth 10, visitors discovered the platform's fresh new look, explored powerful new tools, and got a closer look at over 500,000 AI-related assets designed to support research, testing, and deployment across Europe.

It was a great opportunity to connect with the community and share what's next for AI in Europe.

## Future Events

### AIDA Symposium and Summer School on 'AI/ML Cutting Edge Trends' AIDA AICET2025

[www.aiod.eu](#)

Funded by the European Union

### Next stop: AIDA Symposium & Summer School | July 17-18

The AIDA Symposium and Summer School on AI/ML Cutting Edge Trends is coming up in July, and AIoD will be represented in two practical tutorials by experts from KInT.

- July 17 – **"Applying Design Thinking in AI Research for Positive Social Impact"** with G. Hrčková, using real case studies from AIoD.
- July 18 – **"How to Work with Language Technologies: A Practical Approach"** with M. Tamajka, covering essential concepts and applications.

## Your feedback matters

Help us improve the AI-on-Demand platform.

Use the form to share your overall impressions, and further down, you'll find a dedicated section to assess the usability and accessibility of key tools:

**Metadata Catalogue, AI Catalogue, RAIL, and Identity and Access Management.**

You can choose how to contribute:

- **Authenticated version** (preferred – sign in with Google)
- **Anonymous version** (no sign-in required)

[Give your feedback](#)

Together, we are shaping the future!
